

# **HAPPY ALS/MND PATIENTS**

# OVERVIEW

Motor Neurons run from brain to the spinal cord and from the spinal cord to the muscles throughout the body. The progressive degeneration of the motor neurons eventually leads to their death.

When motor neurons die, the ability of the brain to start and control muscle movement is lost. This also affects a person's ability to speak, eat, move and breathe.

## DR. PASCAL JOACKIM

Came from Tanzania for Motor Neuron Disorder Treatment

Hi, I am Pascal Joackim and I came to Delhi from Tanzania. I am a doctor by profession. From the last 4-5 months, I was encountering symptoms of Motor Neuron Disorder. I was experiencing some very marked symptoms such as loss of balance, learning weakness, dragging of my limbs and sometimes I used to fall because of loss of balance. Also, I at times faced difficulty in reading and writing, particularly with my right hand. I used to play a lot before but after I experienced these symptoms, I could play anymore. I went to seek medical help in my own nation and there I was detected with motor neuron disease. The doctors there suggested me to come here to India for diagnosis confirmation and to seek any possible treatment for this. I came to Delhi as I have heard a lot about stem cell treatment and decided to undergo it. I referred the internet and got in touch with Stem Cell Care India. I explained all my symptoms and previous reports to the doctor. The staff explained all the process to me clearly. My treatment started soon with stem cells. The doctors are really nice and very knowledgeable. There was a new hope in me that I will get better soon. I was admitted to a very comfortable place in the hospital. After I got my treatment, I felt quite better than before. Thanks Team!

## MR. BHUPINDER SINGH

came from MP for Motor Neuron Disease Treatment

It all began a year ago, when my hand movement began to deteriorate. I had a hard time lifting and carrying out my usual tasks. Ayurveda, antibiotics, and other professionals and experts were involved in my therapy. Someone recommended Stem Cell Care India to me when I witnessed no progress. I've seen some progress, and I'm hoping to see more in the future. I'm quite happy with the treatment, and the employees are all very kind and helpful.

## PUSHPA DEVI

Came from Delhi, India for Amyotrophic Lateral Sclerosis Treatment

A 51-year-old lady who had been experiencing progressive weakening in all four of her limbs, starting with her left upper limb, came in for therapy. It's been two years since my fluency has been affected. She hasn't been able to move, swallow, or communicate for four months. After 12 months, the left hand begins to shrink or lose its strength. Ayurvedic medicine was a part of her therapy. A visit to Safdarjung hospital was also made. Things are looking better now thanks to stem cell therapy

# OUTCOME IN ALS/MND PATIENTS

# PATIENT STORIES

## Patrick

**73 years, Germany, 2019**

Patrick who came to India with his got cured from ALS permanently after undergoing stem cell therapy with Stem Cell Care India. He can now live a normal life again after so many years and is now free from this deadly disease.

## Sebastian

**32 years old, US, 2016**

Sebastian was diagnosed with Motor Neuron Disease in 2015. He chose to receive stem cell treatment with Stem Cell Care India in New Delhi and is absolutely happy with his choice as his condition improved a lot after the treatment.

## Meharama

**38 years old, Iraq, 2017**

I was diagnosed with ALS (Amyotrophic Lateral Sclerosis) also known as MND (Motor-neuron Disease) or in November of 2016. I was told I had a year to live, no more than two at best. I decided to undergo stem cell treatment with SCCI in India. I was very happy with the results I got after the treatment. The doctors there were very helpful and encouraging.

## Kristine

**40 years, Germany, 2020**

I am so happy today as I can live a normal disease-free life now. Thanks to Stem Cell Care India for treating me so well.

## Jacob

**35 years, UK, 2018**

I was diagnosed with motor neuron disease in 2017 after some tests. I came to India to undergo stem cell treatment for the same with Stem Cell Care India. I am doing completely fine now. My symptoms have also improved and I am very thankful to the team of SCCI.

# PATIENT STORIES

## Stella

**48 years, Brazil, 2021**

Stella, a 48-year-old patient from the Brazil, got stem cell treatment for ALS and continues to see progresses in her health state. Stella received regenerative treatment, which included inoculations via IV and lumbar puncture, physiotherapy, and occupational therapy. Following the treatment, this 48-year-old ALS patient reports that she saw more than a few improvements to her condition. Getting up on her own feet, Stella observes more power in her legs as well as in the joints. Also, she can now sit up with the shoulder and back straight. In her interview, Stella shared her feelings that she has made a correct decision coming here to go through stem cell treatment. She is also enormously enthusiastic to see even more improvements in the future.

## “ Jossie

**34 years, Australia, 2021**

Jossie, 34 from Australia was detected with ALS. She tried to learn as much as she could about the ailment and prospective treatment alternatives. Eventually, she learns about Stem Cell Care India. She reached out and spoke with one of SCCI's patient representatives. After more than a few calls, she decided to go through stem cell treatment here. Jossie felt more drained and exhausted before starting her treatment. Via the blend of treatments she got at SCCI, she made momentous progress towards retrieval. On top of stem cell therapy, Jossie underwent an amalgamation of occupational therapy, physical therapy, and hydrotherapy. These treatments were tailor-made specifically to engage her body in a way that matches her stem cell treatment. In addition to the treatment she got, Jossie was comprehensively impressed with the admirable quality of care she got from the team of SCCI. She also appreciated the environment and quality of the facilities that she saw here.

## “ Noah Woods

**47 years, American, 2022**

Noah Woods, a 47-year-old American patient was spotted with Amyotrophic Lateral Sclerosis (ALS). In a quest for a treatment that would support her, Noah's friend discovered Stem Cell Treatment at Stem Cell Care India. After an in-depth research, Noah became more assertive in this treatment plan available in India. As a part of her personalized treatment plan, she received stem cell injections via IV and lumbar puncture, which according to her is the most crucial method in the procedure; and also an extensive Rehabilitation program, including occupational therapy, physiotherapy, etc. She stated "the staff here was brilliant and rapidly replied to all the questions I had. The fact that the doctors in charge are so much experienced and veteran people involved in stem cell therapy internationally made me feel tremendously privileged and that I couldn't be in better hands. Within his first 10 days of my Stem Cell treatment for ALS, I began showing signs of advancement." She showed an enhanced aptitude to speak and swallow. She was also markedly stronger than when she first arrived for the stem cell treatment.

## “ Paul

**53 years, USA, 2022**

My father, Mr. Steve Mathews was suffering from ALS disorder. But, after visiting StemCellCareIndia, he got cured successfully.

# PATIENT STORIES

## Angad

**57 years, Norway, 2022**

57 year old, Mr. Angad was a nobleman and had a very jubilant personality. A talented businessman, he owned one of the most famed Asian restaurants in Norway. About 4 years ago, he began having speech disorders and consequently started losing muscle power. He was then diagnosed with ALS. His condition started to depreciate speedily as he started losing ability to chew, swallow and basic motor roles. They were undergoing treatment in Norway for ALS but nothing fruitful was happening. He was also recommended few medications which he took for some time but then after-effects of the medication started cropping up and he essentially became worse than before. So, then Rehman (Angad's son) began eyeing for other options for treatment and based on far-reaching research, they found that mesenchymal stem cell therapy can possibly have a cure for ALS. So, he approached India based Stem Cell Care India for Stem Cell Therapy.

## Julie

**53 years, USA, 2020**

Julie was diagnosed with ALS while in the United States. She tried her level best to find a treatment that would suit her maximum, but the exploration proved fruitless. After eyeing at a few options online, she decided that Stem Cell Care India's stem cell treatment protocol in India was very broad and was precisely what she was eyeing for. Thanks to the stem cell treatment, Julie is now able to stand without any difficulty, swallow better and her hands have amended too, as equated to before getting the treatment. She was enthralled by the care she had gotten during her treatment here in India. She also claimed that the facilities were extremely hygienic and the food was great too.

## Bilal

**62 years, Pakistan, 2021**

Mr. Bilal, 62 years from Peshawar Pakistan was a healthy and active guy till about 5 years ago when he started feeling some feebleness in the thumb on the left leg. Gradually, he started getting incidences of foot drop and within one year of starting of indications he was inept to walk and was restrained to a wheel chair. He also lost the power in the upper limbs soon subsequently. He got in touch with the finest neurological centers in Pakistan and was identified with ALS. The sickness continued to progress and gradually his power to speak and usage of all 4 limbs got affected. That is when the family began investigating on the internet for substitute treatments. They studied about stem cells on the internet and their local doctors recommended them to go for the treatment which promised to alleviate the sickness and stop its progression. They got in touch with Stem Cell Care India, Delhi, India and sent over their medical reports to be investigated. Experts at the clinic recommended the family by explaining the treatment process, risks and victory rates and guided them to go for stem cell therapy.

Stem cell therapy was executed on the patient using patients own body sources viz. patients bone marrow and patient's mesenchymal cells. The cells were processed and re-vaccinated in the patient via Lumbar Puncture and IV. The patient endured the whole process very well without any impediments. Approximately 160 Million cells from were re-injected into the patient. As per the patient's nephew, they saw some upgrading in the patient from 5th day of process where he had started to express himself in a better way than before. The concluding outcomes will be known in 4-6 months' time and expectantly patient will benefit enormously from the therapy. Mr. Bilal says that doctors are very proficient of this clinic and he hasn't been very well looked after. The facility is faultlessly clean, the food is phenomenal, the staff is so welcoming and attentive. He really feels that they have made him their favored and looked after him very well. And wholly, it has been an unbelievably positive experience.

# PATIENT TESTIMONIALS
