

OVERVIEW

Alzheimer's disease or AD is a severe form of dementia causing a steady memory loss and speech problems and ability to perform daily activities.

Those with Alzheimer's also have shortfall of some important chemicals in their brain. These chemicals act as messengers that help to transmit signals around the brain.

OUTCOME IN ALZHEIMER'S DATIENTS

Imran

63 years, Saudi Arabia, 2021

My mother was suffering from Alzheimer's disease and could find relief with any treatment. I would like to appreciate the team of StemCellCareIndia to make my mother fit and healthy again.

Paul is appreciative and thankful to the entire team of Stem Cell Care India for at least trying to put an end to the disease of Alzheimer's via stem cell treatment. Mr. Paul from UK is an energetic young professional, who experienced the punitive realities of Alzheimer's disease and loss of flexibility in a very tough way. More than 8 years ago, Mr. Paul was diagnosed with a disease known as Alzheimer's. It was a game changer for the whole family that 57 years old amusing and funloving individual like Mr. Paul unexpectedly stopped frolicking with his grandchildren, lost his tolerance and is in necessity of relentless support and care. It was truthfully a blessed day when he began probing for potential treatment choices for his condition and reached Stem Cell Care India.

Joseph 70 years, Nigeria, 2020

I am Joseph from Nigeria 70 years old person suffering from Alzheimer's disorder, by profession i was teacher 10 years back and Gradually I was losing my ability to think clearly and remember simple things like names, dates and current information. Even recognizing my relatives was becoming hard. Life was becoming hard. Then one day my son informed me about stem cell treatment for Alzheimer's disorder. He contacted to Stem cell care India team and got complete detail about stem cell therapy and clarity which made me feel safe. After a month we came in India for stem cell therapy it's total 1 week program in which doctor starting the procedure of stem cell therapy and rehabilitation program and now i can seen gradually improvement in my condition.

Peterson

59 years, UK, 2021

One day, I noticed that my mother began to disremember things. This kept snowballing and we decided to take medical assistance and checked with the doctor. It was then she was spotted with Alzheimer's disease. During the following months, little by little, the sickness affected her walking until she was eventually confined to a wheelchair. Her walking was faltering due to phantasms and imaginary obstacles. She could only manage some steps, leaning on two persons with bent legs nearly touching the ground. She had lost all sense of restraint. She became enduringly incontinent. During a transitory period of time she did not sleep, even after taking prescription medicine. It was heartbreaking to see my mother going all emotionless and she even began losing a lot of weight. It was this point which enforced me look into an alternative option. I made the decision to take her for a stem cell treatment even though our doctors, lecturers and even my brother disagreed and discouraged me. When we arrived at the clinic for the stem cell therapy in India, Ciara did nothing but shriek. But the process was well systematized and was speedily implemented. Ciara showed no sign of gigantic pain from the process, which was a respite to us as this implied that she is not hurt from the extraction procedure. During the following months, my mother was recuperating her aptitude to get familiar with her close relatives. She was able to go to the washroom on her own. She had not felt the impulse to go to the bathroom in a long time. At large, we can say that after stem cell therapy, her remembrance has improved regarding day-today activities. Her physical capacities have improved. She is walking more securely. She is steadier emotionally as well. To me, these are all optimistic signs of cell regeneration; particularly when I recall my mother's physical and emotional condition before the treatment.

Shazia

53 years, Bangladesh, 2019

We are from Bangladesh. My 53-year-old wife Shazia was detected with Alzheimer's disease 1.5 years back and it happened so hurriedly and without a care that we all were much traumatized. Several doctors in our nation recommended that she had Alzheimer's and it is in the initial stage so one of our family physicians recommended us to take her to India for stem cell treatment. I investigated on the internet for the varied centers providing Stem cell treatment for this condition and I happened upon the Stem Cell Care India. After a transitory discussion and consultation with the crew of this centre over a few weeks, we made up our mind to take my wife to this center in India for her stem cell therapy for Alzheimer's. From day 1 till her last day of treatment, we got gigantic support and attention from the crew of experts in SCCI and after the prosperous treatment we are back in our nation and my wife is under posttherapy chapter and we can see loads of improvement in her situation.

Faraji

42 years, US, 2022

One day I noticed my dad is not able to recognize the things and his memory is veFaraji from Kenya fro Alzheimer's Disorder

One day I noticed my dad is not able to recognize the things and his memory is very week even he is not able to recognize close relative and friends. I contacted to stem cell care India team and ask them to give the recommendation for my father. They sent me all the details through email and regularly doctor was helping us through Voice and Video call. Once I was comfortable and understand the advantage of Mesenchymal stem cell therapy, i have planed to come in India for stem cell therapy in which SCCI team helped me from Visa processing and finally I arrived India and they pickup me from Airport and we went in the hospital totally 1 week program of stem cell therapy.

Now my father is gradually improved and recognized the things, relative and friends. Thanks to help us ry week even he is not able to recognize close relative and friends. I contacted to stem cell care India team and ask them to give the recommendation for my father. They sent me all the details through email and regularly doctor was helping us through Voice and Video call. Once I was comfortable and understand the advantage of Mesenchymal stem cell therapy, i have planed to come in India for stem cell therapy in which SCCI team helped me from Visa processing and finally I arrived India and they pickup me from Airport and we went in the hospital totally 1 week program of stem cell therapy.

Now my father is gradually improved and recognized the things, relative and friends. Thanks to help us

Johnson

52 years, Australia, 2022

I was working as a software engineer for more than 22 years before retiring. I was been spotted with Alzheimer's in 2008 at the age of 52. I have had Alzheimer's for 10 years. Was taking Atricept and underwent drug therapy as well, which helped to some extent. However, steadily I was losing my aptitude to think openly and remember simple things like names, dates and present-day information. Even identifying my relatives was becoming tough. Life was indeed becoming hard. Then, one day my husband found out about the stem cell treatment for Alzheimer's.

I had my first course of stem cell therapy at Stem Cell Care India in the beginning of 2016. The process was safe and simple. I did not feel any discomposure or aching during and after the extraction of my bone marrow and adipose tissue. The hospital was high standard and the staff was friendly and very generous. All my doubts were replied to with tolerance and clarity, which made me feel secure. I had my second shot of stem cells 6 months later. After a couple of months, I can see a steady improvement in my condition. My memory improved marginally. I have recollected many skills like dressing, makeup, reading and writing with administration. I am also able to help in small domestic errands and kitchen work. I believe that the stem cell have decelerated the time frame of my deterioration. It has given more time to spend with my family. Thanks to the team of Stem Cell Care India!

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Ejaz Khan	45	Sports Injury	Afghanistan	2017	Shakes in the hands gone. Able to get out of the wheelchair.
Berley	6	Autism	Canada	2018	Speech and cognitive abilities improved. Balance amended while sitting.
