

HAPPY BRAIN INJURY PATIENTS

OVERVIEW

Motor vehicle accidents, sports injuries, struck by/against and physical violence are some of the leading causes of traumatic brain injury.

It is not a progressive condition. It is definitely possible for the improvements to last longer with stem cell therapy.

OUTCOME IN BRAIN INJURY PATIENTS

Oluwatomiwa

28 years, Nigeria, 2019

Hi, this is my niece Ms. Oluwatomiwa Ruth Akinniran from Nigeria. She has continuous fever and was unable to walk, eat and do regular activities. She was also unable to use her hands and her voice was also not much strong. She was not able to hear well and had to use a hearing aid device all the time. All this was a part of developmental delay. In order to treat all these issues that she was experiencing, we had tried a lot of options, but all went in vain. After this, we decided to opt for stem cell therapy in a hope that it might benefit her. We went online and after a vast research about stem cell therapy in India, we contacted Dr. Shahid and he gave us the assurance that my niece will get good treatment at his center. We then planned to go to Ghaziabad for the treatment and ever since we have arrived and met at the airport by the hospital manager, we were well seated and were well settled in the hotel. The treatment started immediately. This really impressed me that the treatment started without any delay. I simply adored the way the staff is so welcoming and supportive. Cleanliness is best maintained at the hospital. My niece is very comfortable here. The food was also very good. We had a very pleasant experience. With the treatment, we are hopeful that she gets well soon. Immediately after the stem cell fusion, she was immediately taken to a physiotherapist for healing. I am very satisfied with the treatment.

Maukuko

59 years, Mauritius, 2020

I am Messi Maukuko from Mauritius. I am 59 years old. I was detected with a brain tumor some time back. The tumor was 2.7 mm in size. I was recommended to get the tumor excision surgery done. I underwent that surgery in my country. However, it wasn't much successful and I had to face harsh side-effects of the surgery. After this, I planned to opt for any alternate route. I had heard that the tumor can be resolved without any surgery with the help of stem cell treatment. Therefore, I decided to visit India for my treatment as I explored the net that here, the treatments are given with cutting-edge technology and reasonable prices. I contacted SCCI for this. After the treatment, I am very happy with the results. My condition improved a lot and my tumor is also removed completely now.

Peter

39 years, US, 2021

Peter met with a bike accident on August 2nd, 2013, he was in coma and the CT showed he had a diffuse axonal injury, his right anterior bone and bilateral orbital floor fractured. The doctors cut into the trachea via the neck to save him. He got a nasal feeding tube and a subdural effusion's suction. He woke up after 7 months, but he was insensible, he was not able to move his arms or legs, he also had rigidity. His relatives assisted him do rehabilitation activities repeatedly. He had the nasogastric feeding tube taken out 9 months later and was put on a semi-liquid diet. He had epileptic seizures and when they ensued, he would spread all four limbs, his head would jiggle and turn to one side, and his lower jaw would tremble too. The doctor analyzed him with epilepsy and prescribed Levetiracetam and Clonazepam to control the seizures 10 months year ago. He came to Stem Cell Care India and had stem cells treatment 6 months ago, after the treatment; his breathing was better and had less nystagmus. At times, he had it when he slept. The muscle tension was lower than before; he can now close his mouth. He took pills on a regular basis after he was discharged. The muscle tension was lower, the epileptic seizures stopped. He replied to stimulus (he could turn his upper limbs in front of his chest). He was able to chew the food. He desired a better life, so he came to this clinic again and he was analyzed with sequela of brain injury.

Jalluce

33 years, Japan, 2022

My mother, Mrs. Jalluce from Japan was suffering from a traumatic brain injury. After several failed treatment attempts in our own nation, we decided to opt for stem cell treatment in India. At Stem Cell Care India, the crew not only offered stem cell therapy to my mother but also they provided physiotherapy, occupational therapy, speech therapy and rehabilitation which enhanced the efficiency of the stem cells once they are administered into her. I am so contented with the help of the staff of SCCI and outcomes of the treatment provided by the whole team of SCCI, India that I have already vouched for their facility to my relatives and friends back in my home nation. The superlative part about them is that they offer first-rate superb stem cell treatment at a very cost-effective and low cost which can be even managed by the individual dealing with financial crisis. I really want to thank the whole team of treating my mother.

Jaheed

59 years, Pakistan, 2021

My aunt life went miserable when she was hit with a brain injury. Then, I insisted upon availing the medical facilities of StemCellCareIndia. Thankfully, she got back in good health again.

Katy

10 years, US, 2022

Katy was born at her mother's 27 weeks pregnancy. The weight was 1.56Kg at birth time. She stayed in incubator for numerous days. The breathing, heart rate and sucking touched normal level. The patient suffered from lung infection when she was 3 months old. She had the entire body turn purple and experienced breathing trouble. Her breathing and heartbeat stopped for 7 minutes. After cardiopulmonary resuscitation, the breathing and heart rate was reinstated to normal. After 15 weeks of treatment, her mother found out that the movement of Katy's limb was different with other. There was no vigorous movement.

After admission at Stem Cell Care India, Katy received pertinent examinations. The patient received treatment for nerve regeneration and to stimulate stem cells in vivo. The patient received treatment to improve the blood circulation so as to upsurge the blood supply to the impaired nerves and also to nurture the neurons. She also received treatment to improve her immunity. This was pooled with rehabilitation training. The muscle tone of both lower limbs has abridged to normal level. The internal spin of toes and slight tiptoe condition has been assuaged. The flexion of knees has been relieved. Both lower limbs can be stretched improvingly. Left knee joint can be flattened totally. Right knee can be straightened with slight help. The patient's condition has upgraded.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Ejaz Khan	45	Sports Injury	Afghanistan	2017	Shakes in the hands gone. Able to get out of the wheelchair.
Berley	6	Autism	Canada	2018	Speech and cognitive abilities improved. Balance amended while sitting.
Justin	32	Muscular dystrophy	Brazil	2017	Balance and feet strength improved. Was able to get out of wheelchair unaided.
Mohd. Kasim	72	Type 2 Diabetes	Kuwait	2019	100 % bladder control was there and patient's sugar levels were under control.
Wasim Jafar	39	Motor Neuron Disease	Ghana	2020	Muscle strength improved. Able to live a better and healthier life than before.
Kevin	12	Ataxia	USA	2020	Walking was improved to a great extent. Patient was able to balance himself better.
Jim Mark	29	Liver Cirrhosis	Lebanon	2019	The patient's liver function improved and is able to eat food in a better way.
Rajesh Batra	41	Optic nerve atrophy	India	2018	Was able to see and detect light better and the eyesight improved a lot.
Kelly	33	Retinitis Pigmentosa	Australia	2020	After the treatment, visual field test results were better. Field of view and night vision also improved.
Kristeen	37	Macular Degeneration	Taiwan	2019	Day & night vision became better with improved vision for objects & light.
Marie Bella	45	ILD	USA	2017	Patient recovered from the disease in a short span of time and is now living a better life.
Tony Joseph	54	Muscular Dystrophy	USA	2017	The patient's condition improved with regenerative medicine and physiotherapy both combined.
Ram Manohar	62	Optic neuritis	India	2017	Improved bilaterally in vision sharpness, visual field and is able to see far off things better now.
Mohd. Kadar	41	Muscular Atrophy	Qatar	2018	Enhancements in awareness, responsiveness and Better sensory stimulation.
Fendi Morrson	78	Anti-ageing	UK	2019	The patient was able to get rid of wrinkles and the skin became supple and younger than before.
Valson	67	Osteoarthritis	Indonesia	2020	Is now able to use the staircase without the need for handrail. Walking and gait has become much better.
Zachary	17	Friedrich's Ataxia	Canada	2015	Able to stand up, bend over and touch the floor for the first time in 3 years.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Mark Morrison	58	Type 1 Diabetes	Canada	2017	Blood glucose levels were brought under control and foot ulcer also got cured.
Jordan	72	Heart disease	Germany	2018	Heart's ejection reaction improved a lot. Was able to live a healthier life after the treatment.
Pranjali Saxena	6	Cerebral palsy	India	2018	General muscle strength improved and considerable betterment in mobility and coordination.
Jospeh	46	Brain injury	Germany	2017	Much better results of improvement in awareness, responsiveness and sensations.
Ahmed Aksar	38	Multiple Sclerosis	Pakistan	2019	After treatment, the patient was able to walk at normal pace up to few kms.
Ashley	34	Ataxia	UK	2018	Able to stand up, bend down and touch the floor with ease and smoothness.
Oscar	42	ALS	USA	2020	Breathing and swallowing function improved greatly.
Zubina	51	CKD	Afghanistan	2017	Was able to survive without kidney transplant successfully.
Carl Smith	61	Rheumatoid arthritis	Germany	2018	Was able to use the staircase after a long time of 4 years. Pain in the knees also subsided.
David Paul	44	Spinal cord injury	Scotland	2019	Balance improved a lot while sitting. The patient is able to walk and stand in a much stable way.
Shehzad Ali	4	Autism	India	2017	Speech became clear and socially more affable. Balance and mobility also improved.
Sri Rangnath	45	Multiple sclerosis	Hungary	2018	Increased muscle strength was seen. The patient was able to sit and stand for long after the treatment.
Natalie	32	Glaucoma	Australia	2020	Was able to see objects at a distance in a better way after the treatment. Eyesight also improved.
Kathrine	16	Ataxia	England	2019	Balance of the body improved and is now able to walk properly without any support.
Thomas Clark	44	Retinopathy	South Africa	2017	Vision was improved significantly and the patient was able to see things in a better way.
Preetpal Singh	58	Osteoarthritis	USA	2018	Balance improved significantly and there was increased sensation in legs was seen.

PATIENT TESTIMONIALS

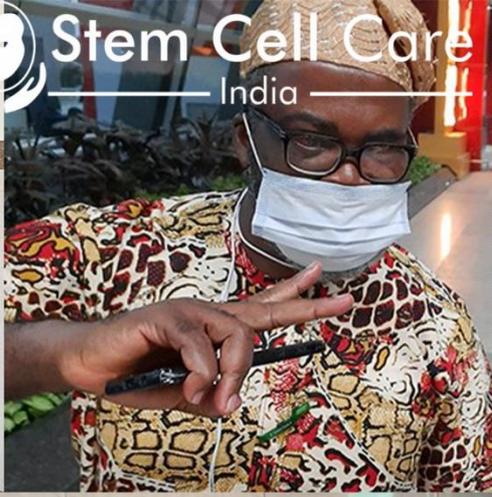

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Jessica Kukreja	42	Traumatic brain injury	USA	2017	Tremors in the legs decreased with time and there was better stability in the legs.
Amy Jackson	3	Cerebral Palsy	Argentina	2020	Vivid increase in appetite and motor abilities also improved to a great extent.
Smith Bross	24	Spinal Cord Injury	Australia	2019	There were some amazing improvements observed after the treatment and the patient was able to walk better.
Rakesh Kumar	32	Duchenne Muscular Dystrophy	India	2015	Able to extend his limbs fully.
Jim Vishoot	35	Traumatic Brain Injury	USA	2015	Tension reduced in facial muscles. Strength in his legs increased.
Katharina Adler	35	Ataxia	Canada	2015	Walking improved considerably.
Andrew Ricci Wallace	3	Cerebral Palsy	Australia	2016	Stopped choking while drinking and the gastric emptying problem had improved and could eat food more than just mushy consistency.
Mr. Yusuf	32	Multiple Sclerosis	Nigeria	2015	Better balance, no double vision and improved sensation on her right side of the face.
Parul Dev	8	Cerebral Palsy	USA	2015	Gained partial independence in her daily activities.
Akiki Juliet	6	Batten Disease	Lebanon	2015	Spasticity disappeared and his grip returned.
Ross Taylor	32	SCA 2	Zimbabwe	2016	Spasticity disappeared and his grip returned.
Milan Ayan	8	Autism	Afghanistan	2016	Episodes of stumbling after waking disappeared.
Carl Stevens	57	Ischemic Optic Neuropathy	USA	2015	Able to speak in complete sentences more than ten words.
Mr. Brandon	19	Multiple Sclerosis	Australia	2015	Able to perceive light sources.
Mr. Osama	26	Amyotrophic Lateral Sclerosis	Ghana	2016	Able to walk at normal pace for a few km.
Md Rasheed	53	Traumatic Brain Injury	Pakistan	2015	Breathing improved; swallowing improved with less hiccup episodes.
David Robert Blair	33	SCA 1	Scotland	2015	Regained consciousness.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Imran Khan	26	Traumatic Brain Injury	Bangladesh	2015	Increased balance and trunk strength.
Sana Naaz	2	Cerebral Palsy	Pakistan	2015	Dramatic increase in appetite.
Gabor Bocskai	19	Cerebral Palsy	Hungary	2015	Balance improved while sitting. Improvements in reading.
Ahmed	33	SCA 3	Afghanistan	2016	Choking during meals reduced.
Jessica	22	Traumatic Brain Injury	USA	2015	Tremors in the hands disappeared. Able to get out of the wheelchair unaided.
Jordan	13	Glucose Transporter Deficiency Syndrome	USA	2015	Speech and cognitive skills improved.
Sachin	43	ALS	India	2016	Balance improved while sitting.
Smith	59	Bulbar ALS	Australia	2016	Able to get out of the wheelchair unaided.
Kevin	37	Heart Disease	Australia	2015	Heart's ejection fraction improved from 20% to 50%.
Josephine Stramiello	3	Cerebral Palsy	Zimbabwe	2015	Overall muscle strength improved.
Shazad Ali	7	Cerebral Palsy	Iraq	2016	Balance and trunk strength improved.
Kymerly Graf	19	SCA 2	Canada	2016	Mobility and coordination improved considerably.
Michael	12	Autism	Australia	2016	Sensation improved.
Amy Lewis	2	Brain Injury	USA	2016	Improvements in awareness, responsiveness and sensory stimuli.
Sumaiya	9	Epilepsy	Pakistan	2016	Balance improved and climbed stairs unaided.
Gurmeet Singh	26	Friedrich's Ataxia	Australia	2016	Balance improved and increased sensation in the legs.
Lukas Nguyen	3	Traumatic Brain Injury	USA	2016	Muscle strength improved.
Maria	5	Autism	Romania	2016	Temper tantrums significantly reduced.
Mark Godzilla Yu	6	Autism	USA	2014-2016	Behavioural, language and social skills improved. Speech became clear and socially more amiable.
Raghav Sharma	12	Autism	India	2015	Able to dress himself and comb his hair.
Swati Verma	23	Ataxia	India	2016	Balance improved and climbed stairs without assistance.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Maya Madura	7	Epilepsy	Hungary	2015-2016	Seizures had stopped and speech became better.
Mitchell Pacis	6	Autism	Australia	2015	Speech improved and started to utter single words.
Undisclosed	39	Glaucoma	South Africa	2016	Improvements bilaterally in visual acuity, visual field and VEP in post-treatment eye exam.
Nate Redman	17	SCA 7	USA	2016	Improvements in speech and balance.
Kevin	58	Huntington's Disease	USA	2016	Balance and mobility improved. Gave up cane for walking.
Paul Thomas Flynn	43	Hereditary Ataxia	USA	2014-2016	Improvements in balance and speech.
Rashid Ali	50	Multiple Sclerosis	Bangladesh	2014-2015	Convulsive tremors ceased. Gained some bladder control.
Undisclosed	12	Muscular Dystrophy	USA	2015	Increase in muscle strength.
Raghav Lakhotia	21	Spinal Cord Injury	India	2014	First treatment—•vision improved considerably and could raise right arm completely. Second treatment—•no significant changes were seen.
Rajiv Saluja	52	Multiple Sclerosis	India	2016	First time—•100 % bladder control was achieved. Second time in 2012 — BP became normal and stopped taking his BP medication that he was taking since 1998.
Robert Frank Flynn	49	Hereditary Ataxia	USA	2015-2016	Able to stand in the shower without a support for an extended time.
Russ Kleve	58	FSHD Muscular Dystrophy	USA	2016	Walking and gait has improved. Falling has reduced.
Sachin Goel	28	Limb Girdle Muscular Dystrophy	India	2015	Improvements in shoulder muscle & improvement in stamina.
Susan Monica Glenn	41	Multiple Sclerosis	England	2014-2016	Balance improved and the convulsions reduced.
Timothy Graf	45	SCA2	USA	2015	Able to use the stairs without the help of the handrail.
Undisclosed	30	SMA3	Indonesia	2014-2016	Does not get asthmatic bronchitis during seasonal change.
Travis Ashton	18	Traumatic Brain Injury	USA	2015-2016	The major change was seen in the control of his mouth and drooling improved significantly.
Valerie Crowter	51	Hereditary Ataxia	Canada	2014-2016	A huge reduction in the frequency and severity of cramps in her legs.
