

HAPPY DOWN SYNDROME PATIENTS

OVERVIEW

Down syndrome is a chromosomal ailment that causes damage in the physical and cognitive growth of a kid. It is the most common reason for mental retardation amongst kids.

People with Down syndrome experience typical features such as a flat face and a short neck. These features bring all the difference in the characteristics from person to person

Just had treatment at stemcellcare clinic, I find that the doctor and staff very professional and accomodating
Especially the Doctor Manage was most understanding and patient to my needs , also the manager Adil there was most helpful in all areas of my stay
I highly recommend Stemcellcare india

OUTCOME DOWN SYNDROME PATIENTS

PATIENT STORIES

“

Traci M Grant

03 years old, Kentucky, 2019

I have used this stem cell treatment for my daughter who had Down syndrome. I found the stem cells of a donor patient and have the stem cells injected into the brain of my daughter. The results have been quite impressive. She was not able to walk properly. But after the stem cells injection, she is able to walk properly and has become more active and alert. I am thankful to the doctor who did this stem cell treatment for my daughter..

“

Tauseef Ansari

02 years old, UP, India 2020

I had doubts about the treatment until I started noticing that the effect was visible in my kid. He stopped having seizures, and his muscle tone improved. It has been 3 months since we started the treatment and I can see improvements in his overall health. So, I would definitely recommend this treatment to other parents.

“

Sienna Allan

04 years old, Scotland, 2021

I had a stem cell therapy in India and I couldn't be happier with my results. The doctors have been incredible and the treatment is so much less painful than I expected. And the best part is that my results have been long-lasting and I'm seeing continued improvement. I highly recommend Stem Cell Care India to anyone who is looking for stem cell treatment in India.

“

Baby Of Mr. Mark

03 years old, UK, 2022

Our baby was born with Down syndrome and she had had subnormal motor skills. Once she was 3 years old, we decided to opt for stem cell therapy at StemCellCareIndia in India. After the treatment, she has shown a lot of improvement. Our baby was admitted with complaints of delayed milestones, lack of voice, cardiac shortcomings, slanted eyes and with no neck holding capacity. She underwent two sessions of stem cell treatment of which the first session lasted for around three months. By the end of three months, the muscle tone was improved in all limbs. She also had started babbling and crawling gradually. She was more social and was able to identify his near ones after the first session. Better results were observed with no hostile events. We are really happy with her treatment and want to thank the team of SCCI.

Abdur khan

03 month old, Dubai, 2020

I had doubts about the treatment until I noticed the effect on my kid. He stopped having seizures, and his muscle tone improved. It has been 3 months since we started the treatment, and I can see improvements in his overall health. So, I would recommend this treatment to other parents. I am very thankful to the team of stem cell for supporting us throughout the procedure.

“

Laila

09 years old, Abu Dhabi, 2022

After being spotted with Down syndrome at birth, Laila's parents knew they are required to find a way to help their daughter attain a better quality of life. After a lot of futile efforts in their own native land, they decided to take her to India for stem cell treatment as they had heard a lot about this treatment. They contacted the team off Stem Cell Care India and the team helped them in all their arrangements to come here to India. While getting her second round of stem cells, Laila is seeing improvements in muscle tone, cognitive capacity and motor skills. She has more liveliness, energy and she is repeatedly reaching towards her objective of self-dependence. Her parents are very contented with the way SCCI's team treated their daughter..

“

Meher Randhawa

05 years old, Canada, 2022

I tried stem cell therapy in India for my daughter, and I couldn't be happier with the results. The doctors have been incredible, and the treatment is much less painful than we expected. And the best part is that my results have been long-lasting, and I'm seeing continued improvement in my kid's condition. I highly recommend Stem Cell Institute to anyone looking for an effective and safe treatment for down syndrome in India.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
