

HAPPY ERECTILE DYSFUNCTION PATIENTS

OVERVIEW

Erection problems are also called erectile dysfunction or impotence. Erectile problems can have causes by stress, anxiety, depression, and relationship issues.

Your genes may hold the key to ED care in the future. Researchers are working with gene therapy as a long-term remedy and potentially a cure for ED.

ROHIT

came from Hyderabad for Erectile Dysfunction

PATIENT STORY

www.stemcellcareindia.com
info@stemcellcareindia.com
+91 8743024344

Hi, I am Rohit and I have erectile dysfunction problem. I knew I had this problem from past 1 year. Probably from past 6 years, I was having this issue and gradually it increased with time. I took me a lot of time to realize that I had erectile dysfunction. When I was 17 years old, I had Hodgkin lymphoma for which I underwent chemotherapy and radiation therapy. After that, there was some effect on the nerves because of which I developed erectile dysfunction. Since 2014, I was facing many health concerns and digestive problems too. To cure my ED, I started with medicines but even after high dosage of tablets, I was not able to improve my condition. After that, I went to another doctor for shock treatment. There was a bit of improvement after that therapy but I wasn't much satisfied. Then, at that time, I researched a lot about stem cell therapy and I read a lot about it. It is a new technology and the results are promising. I contacted Stem Cell Care India via mail and they explained me the whole process and also told me about the fees. I came here and I am taking stem cell treatment via SCCI. I am hopeful that my condition will improve.

OUTCOME ERECTILE DYSFUNCTION PATIENTS

Peter

34 years old, UK, 2016

I am Peter and I was suffering from erectile dysfunction. This condition was impeding my sexual life immensely. Now that I am cured, I would like to thank the crew of Stem Cell Care India for the stem cell treatment.

Mike

98 years old, UK, 2019

Mike was suffering from the problem of erectile dysfunction and had to face lots of embarrassment in front of his wife. He then underwent stem cell therapy for ED with SCCI in India and is now able to enjoy a healthy sexual life with his spouse.

Daniel

30 years old, US, 2020

Daniel is very thankful to the SCCI clinic and feels that it has all the high-tech technologies and commendable human resource to lawfully apply stem cell therapies to cure erectile dysfunction.

Mohd. Ali

29 years old, Pakistan, 2017

Mohd. Ali was suffering from erectile dysfunction. He underwent prostate surgery a year ago but there wasn't much improvement. After the surgery, he decided to undergo stem cell treatment at Stem Cell Care India and was able to have intercourse again after undergoing stem cell therapy successfully.

Brian

35 years old, Canada, 2018

Stem cell treatment has cured erectile and has given Brian a new life of sexual pleasure and self-confidence. He had till now not seen any side-effect and has continued to have good erectile function after 12 months follow-up, indicating that this might be a long-standing solution.

Rohit

35 years, Delhi, 2020

Hi, I am Rohit and I have erectile dysfunction problem. I knew I had this problem from past 1 year. Probably from past 6 years, I was having this issue and gradually it increased with time. I took me a lot of time to realize that I had erectile dysfunction. When I was 17 years old, I had Hodgkin lymphoma for which I underwent chemotherapy and radiation therapy. After that, there was some effect on the nerves because of which I developed erectile dysfunction. Since 2014, I was facing many health concerns and digestive problems too. To cure my ED, I started with medicines but even after high dosage of tablets, I was not able to improve my condition. After that, I went to another doctor for shock treatment. There was a bit of improvement after that therapy but I wasn't much satisfied. Then, at that time, I researched a lot about stem cell therapy and I read a lot about it. It is a new technology and the results are promising. I contacted Stem Cell Care India via mail and they explained me the whole process and also told me about the fees. I came here and I am taking stem cell treatment via Stem Cell Care India. I am hopeful that my condition will improve.

Mike

29 years, Canada, 2021

I am Mike and was suffering from erectile dysfunction. This ailment was hampering my sexual life tremendously. Now that I am cured, I would like to thank the team of StemCellCareIndia for the treatment.

Jacob

42 years, Norway, 2022

Jacob, a resident of Norway, was suffering from the issue of erectile dysfunction and had to face a lot of embarrassment in front of his wife. His confidence level was also going down day by day. He had tried several medicines and solutions but all went in vain. Then, he planned to opt for stem cell treatment. In first-phase treatment sessions, he was able to have sex six months after the one-time treatment, without recourse to medications or penile implants. The optimistic outcome showed no signs of flagging during a succeeding year-long monitoring period. That is much better than taking a capsule every time you want to have intercourse. The outcomes were promising enough to satisfy the patient that he has been cured. To carry out the procedure, doctors at Stem Cell Care India removed fat cells from a patient's belly via liposuction. The cells go through a brief treatment and arise as all-purpose stem cells, meaning they can transmute into almost any specialized cell in the body. The stem cells are then inoculated with a syringe into the penis, where they extemporaneously start to change in to nerve and muscle cells, as well as the endothelial cells that line blood vessels. The patient was under general anesthesia while all of this happened and Jacob got discharged from hospital the same day.

Jacob is very grateful to the clinic and feels that it has state-to-the art technologies and admirable human resource to lawfully apply stem cell therapies. Their goal is to offer the patients all the opportunities available to address their particular health needs so as to improve their quality of life.

Munasib

30 years, Bahrain, 2020

I am Munasib from Bahrain. I came to India for finding an effective cure for the issue of erectile dysfunction that has been hampering my married life for 5 years. Initially, I was recommended to undergo prostate surgery 3 years back. However, this surgery went futile in treating my problem. Then, I planned to opt for stem cell treatment at SCCI in India. In the initial treatment sessions, I was able to have sex six months after the one-time treatment, without taking back the medications or opting for penile implants. The positive outcome showed no signs of waning during this year-long nursing period. I found this treatment much better than taking a capsule every time me and my wife desired to have intercourse. The results were promising enough to gratify me. Thanks Stem Cell Care India.

Mondal

28 years, Spain, 2020

Mondal from Spain came to India for the stem cell treatment of erectile dysfunction. Mondal is very appreciative to the clinic and feels that it has very high-end technologies and commendable staff to lawfully apply stem cell therapies for his problem. After undergoing stem cell treatment at Stem Cell Care India, he was able to have intercourse again after going through a stem cell therapy using cells taken from his own abdomen. He had recuperated satisfactory erectile function to accomplish penetrative sexual movement. This enhancement has been retained for one year, stipulating that this treatment may give him long-term benefits as well. He feels really happy and contented in life now.

Ali

41 years, UAE, 2022

Ali was suffering from erectile dysfunction. He underwent prostate surgery 3 years ago but that was of no help. After the surgery, he planned to undergo stem cell treatment at Stem Cell Care India and was able to have intercourse again after undergoing a stem cell therapy using cells taken from his own abdomen. Six months after undergoing a one-time stem cell treatment, he was very happy and was able to have sex without the use of other medications or implants. Doctors used liposuction to collect fat from the patient's abdomen, from which stem cells were taken out and then injected into the patient's penis. The doctors at the clinic do not cultivate the cells or change them in any way.

The process was implemented under general anesthesia and Ali was discharged the same day. Once inoculated, the stem cells started to change into muscle and nerve cells, as well as the endothelial cells that line blood vessels. Within six months, Ali reported that he had recovered satisfactory erectile function to accomplish penetrative sex. There weren't any substantial side effects. Stem cell treatment can cure erectile and has given Ali a new life of sexual pleasure and confidence. He had until that time seen no effect from old-style medical treatment and continued to have good erectile function after 12 months follow-up, signifying that this might be a long-standing solution. Six months after treatment, He had regained adequate erectile function to accomplish penetrative sexual activity. This improvement has been retained for one year, specifying that this treatment might yield long-term benefits. This method promises to be a long-standing solution for patients suffering from erectile dysfunction, who have not seen advantageous effects of old-style medication, such as PDE5 inhibitors (Viagra and Cialis), injections or penile implants.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Ejaz Khan	45	Sports Injury	Afghanistan	2017	Shakes in the hands gone. Able to get out of the wheelchair.
Berley	6	Autism	Canada	2018	Speech and cognitive abilities improved. Balance amended while sitting.
Justin	32	Muscular dystrophy	Brazil	2017	Balance and feet strength improved. Was able to get out of wheelchair unaided.
Mohd. Kasim	72	Type 2 Diabetes	Kuwait	2019	100 % bladder control was there and patient's sugar levels were under control.
Wasim Jafar	39	Motor Neuron Disease	Ghana	2020	Muscle strength improved. Able to live a better and healthier life than before.
Kevin	12	Ataxia	USA	2020	Walking was improved to a great extent. Patient was able to balance himself better.
Jim Mark	29	Liver Cirrhosis	Lebanon	2019	The patient's liver function improved and is able to eat food in a better way.
