

HAPPY EYE INJURY PATIENTS

OVERVIEW

The human eye is a complex yet imperative organ of our body filled with nerves, a lens, liquid and more. This organ gives us the aptitude to envisage the world in different colors, shapes and dimensions, all centered on the reflection and refraction norm.

Occipital lobe is the portion of the central nervous system which is accountable for deciphering the vision. Thus, any impairment to optic nerve can sternly affect the central vision, peripheral vision and color vision of an individual.

OUTCOME EYE INJURY PATIENTS

Meghan

34 years, Texas, 2020

After being inept to walk liberally without bashing on objects and harming herself, Meghan was detected with serious eye disorders, a condition which fast-tracks the degeneration of the visual field.

Patients with this condition experience snowballing loss of vision and might feel as if they are looking via a telescope because of the restricted range of visualization.

Before arriving in India at Viezec, she was very exhausted owing to the job. Physically, she felt very overwrought and exhausted. Now after five days of treatment, she feels more comfortable and much superior.

Before visiting Viezec, Meghan's vision was principally distorted; this stopped her from being able to see much. However, only five weeks after getting stem cell treatment for eye disorders from the facilities in India, her vision became stronger than before, permitting her to observe objects around her and be able to walk more self-reliantly.

Amrit

29 years, Canada, 2022

I visited India for the treatment of eye injury via stem cells. I was diagnosed with severe eye disorders, a condition that fast-tracks the degeneration of the visual field. Before visiting Viezec Stem Cell Institute or undergoing any treatment, my vision was chiefly distorted, and this stopped me from being able to see much. However, only five weeks after getting stem cell treatment for eye disorders from the facilities in India, my vision became more vital than before.

Victoria

42 years, England, 2022

After encountering a car accident in eighth grade, Victoria developed optic nerve atrophy (ONA), which instigated her vision to worsen over quite a lot of years to the point where she had to leave her much-loved job. She first started losing her vision superficially. This was a very slow and steady procedure. She was still able to partake routinely in sports and curriculums in high school. After high school, when she graduated, she had my first central vision loss. Then she decided to opt for stem cell treatment at Viezec. She feels much better in her vision after she went in for the treatment.

Chris

36 years, Germany, 2022

Hi, I am Chris from Germany, and I came to India a few months back for stem cell therapy. I was detected with a severe eye injury, which affected my visual arena. And over time, I started experiencing vision loss due to the restricted range of vision. After much research and searching online, I learned about Viezec Stem Cell Institute, offering stem cell therapy which proves to be a safe and effective treatment for my condition. Then I decided to fly to India for the further procedure. Now, after the treatment, I can observe many improvements in my vision

PATIENT TESTIMONIALS

| PATIENT NAME | AGE | DISORDER | COUNTRY | YEAR OF TREATMENT | FOLLOW-UP FEEDBACK |
|----------------|-----|----------------------|-------------|-------------------|---|
| Ejaz Khan | 45 | Sports Injury | Afghanistan | 2017 | Shakes in the hands gone. Able to get out of the wheelchair. |
| Berley | 6 | Autism | Canada | 2018 | Speech and cognitive abilities improved. Balance amended while sitting. |
| Justin | 32 | Muscular dystrophy | Brazil | 2017 | Balance and feet strength improved. Was able to get out of wheelchair unaided. |
| Mohd. Kasim | 72 | Type 2 Diabetes | Kuwait | 2019 | 100 % bladder control was there and patient's sugar levels were under control. |
| Wasim Jafar | 39 | Motor Neuron Disease | Ghana | 2020 | Muscle strength improved. Able to live a better and healthier life than before. |
| Kevin | 12 | Ataxia | USA | 2020 | Walking was improved to a great extent. Patient was able to balance himself better. |
| Jim Mark | 29 | Liver Cirrhosis | Lebanon | 2019 | The patient's liver function improved and is able to eat food in a better way. |
| Rajesh Batra | 41 | Optic nerve atrophy | India | 2018 | Was able to see and detect light better and the eyesight improved a lot. |
| Kelly | 33 | Retinitis Pigmentosa | Australia | 2020 | After the treatment, visual field test results were better. Field of view and night vision also improved. |
| Kristeen | 37 | Macular Degeneration | Taiwan | 2019 | Day & night vision became better with improved vision for objects & light. |
| Marie Bella | 45 | ILD | USA | 2017 | Patient recovered from the disease in a short span of time and is now living a better life. |
| Tony Joseph | 54 | Muscular Dystrophy | USA | 2017 | The patient's condition improved with regenerative medicine and physiotherapy both combined. |
| Ram Manohar | 62 | Optic neuritis | India | 2017 | Improved bilaterally in vision sharpness, visual field and is able to see far off things better now. |
| Mohd. Kadar | 41 | Muscular Atrophy | Qatar | 2018 | Enhancements in awareness, responsiveness and Better sensory stimulation. |
| Fendi Morrison | 78 | Anti-ageing | UK | 2019 | The patient was able to get rid of wrinkles and the skin became supple and younger than before. |
| Valson | 67 | Osteoarthritis | Indonesia | 2020 | Is now able to use the staircase without the need for handrail. Walking and gait has become much better. |
| Zachary | 17 | Friedrich's Ataxia | Canada | 2015 | Able to stand up, bend over and touch the floor for the first time in 3 years. |

PATIENT TESTIMONIALS

| PATIENT NAME | AGE | DISORDER | COUNTRY | YEAR OF TREATMENT | FOLLOW-UP FEEDBACK |
|----------------|-----|----------------------|--------------|-------------------|---|
| Mark Morrison | 58 | Type 1 Diabetes | Canada | 2017 | Blood glucose levels were brought under control and foot ulcer also got cured. |
| Jordan | 72 | Heart disease | Germany | 2018 | Heart's ejection reaction improved a lot. Was able to live a healthier life after the treatment. |
| Pranjal Saxena | 6 | Cerebral palsy | India | 2018 | General muscle strength improved and considerable betterment in mobility and coordination. |
| Jospeh | 46 | Brain injury | Germany | 2017 | Much better results of improvement in awareness, responsiveness and sensations. |
| Ahmed Aksar | 38 | Multiple Sclerosis | Pakistan | 2019 | After treatment, the patient was able to walk at normal pace up to few kms. |
| Ashley | 34 | Ataxia | UK | 2018 | Able to stand up, bend down and touch the floor with ease and smoothness. |
| Oscar | 42 | ALS | USA | 2020 | Breathing and swallowing function improved greatly. |
| Zubina | 51 | CKD | Afghanistan | 2017 | Was able to survive without kidney transplant successfully. |
| Carl Smith | 61 | Rheumatoid arthritis | Germany | 2018 | Was able to use the staircase after a long time of 4 years. Pain in the knees also subsided. |
| David Paul | 44 | Spinal cord injury | Scotland | 2019 | Balance improved a lot while sitting. The patient is able to walk and stand in a much stable way. |
