

### OVERVIEW

Alopecia Areata is one of the most common T cell-mediated autoimmune skin diseases, leading to chronic and relapsing hair loss from the scalp, hair and neck. In simple terms, the immune system gets confused & starts attacking the hair follicle considering it as an intruder to the body.

People not only suffer from baldness and hair loss due to biological or nutritional factors, they also experience hair loss at a young age due to high levels of stress and infection.

#### Rash Yadav

1 review

★★★★ a year ago

Thanks to the stem cell Care India, Julie is now able to stand without any difficulty, swallow better and her hands have amended too, as equated to before getting the treatment. She was enthralled by the care she had gotten during her treatment here in India. She also claimed that the facilities were extremely hygienic and the food was great too.

## OUTCOME ALOPECIA AREATA (HAIR LOSS) DATIENTS

#### PATIENT STORIES

### Brittany Cummings

34 years old, pensylvania, 2020

I was looking to overcome my hair loss and came across this. Stem Cell Treatment for Hair Loss is a proven method to combat hair loss and maintain a healthy scalp. I'm sure glad I found out about this.

I was desperately looking for a natural, affordable, and long-lasting solution to my hair loss problem and I found stem cell therapy. The treatment is painless and the results are very long-lasting. I feel so much better about myself now. I can't thank SCCI enough.

### Raghav Rujjena 48 years old, Bihar, India, 2016

I have tried other products for hair loss and was left disappointed. I was at my wit's end when I came across this. I decided to give stem cells a try and within a few days, I noticed a difference in the amount of hair I was losing. It has been over a year and I have to say my hair loss has stopped completely. I am so happy I found this therapy and I would recommend it to anyone who is suffering from hair loss.

#### Mr. John

**39 years old, USA, 2021** 

Mr. John, a 39 year old, professional frantically wanted to reinstate his frontal hairline back. In a very young age, he had misplaced majority of his hair from anterior and crown zone of his scalp. Like countless of the individuals out there, his rare hair loss was a reason of social discomfiture to him. In his preliminary phase, he tried a lot of self-treating options! He tried quite a lot of shampoos, supplements and alternate treatment options of conceal, which eventually made him more disheartened with the upsurge in hair loss; this forced him to come to us i.e. Stem Cell Care India and opt for the hair restoration with stem cell treatment. Posttherapy, he was very happy to see his crowning glory returning back to him. He experienced a lot of improvement in his life after getting this treatment at SCCI.

#### **PATIENT STORIES**

#### Maluha

48 years old, Assam, 2021

Maluha from Assam came to Delhi, India for treating her hair loss concern via stem cell treatment at Stem Cell Care India. Mrs. Maluha, a 48 year old lay, professional gardener underwent stem cell treatment for hair loss using mesenchymal cells in India at Stem Cell Care India under the supervision of experienced and dedicated doctors on 3rd January 2019. After getting stem cells inoculated into the bald areas of her head, there were farfetched perceptible improvements that were observed by her and also by the individuals around her, both at home and her workplace. After the treatment, she has splendidly recouped her confidence back! She is quite stunned with overall trial methods and at the end of the day is appreciative for her decision to progress with stem cells treatment to bid adieu to her hair loss problems for life.

I, Mathew Thomas, was suffering from severe hair loss or Alopecia Areata. My self-confidence was going down.

StemCellCareIndia helped me to save my crowning glory with its amazing treatment options.

#### Jaccob Flew

36 years old, UK, 2021

Mr. John, a 39 year old, professional frantically wanted to reinstate his frontal hairline back. In a very young age, he had misplaced majority of his hair from anterior and crown zone of his scalp. Like countless of the individuals out there, his rare hair loss was a reason of social discomfiture to him. In his preliminary phase, he tried a lot of self-treating options! He tried quite a lot of shampoos, supplements and alternate treatment options of conceal, which eventually made him more disheartened with the upsurge in hair loss; this forced him to come to us i.e. Stem Cell Care India and opt for the hair restoration with stem cell treatment. Posttherapy, he was very happy to see his crowning glory returning back to him. He experienced a lot of improvement in his life after getting this treatment at SCCI.
