# OUTCOME IN INTELLECTUAL DISABILITIES PATIENTS

## Reshma

**12 years, New Delhi, 2022**

Hi, I am Reshma, and I visited India in 2016 when my daughter showed some signs of intellectual disabilities. SCCI has given us scores of new hope. We listened to lots of positive stories about it, and I believe in it. And since the last time we have been here in India, I have been noticing, and a lot of individuals have told us, that this therapy works. After undergoing this treatment, my daughter can understand much more. Her attention is much better. So we really want to thank the team of SCCI.

## Mariam

**8 years, Zürich, 2022**

I am Mariam's mom. I have to say that I have been most awe-struck by the SCCI overall professional approach and the advantage that my daughter Mariam had received from the stem cell injection as she was suffering from some intellectual disabilities. The staff was excellent and quickly answered any questions I had regarding the treatment and expected outcomes. I can't say enough good things about the doctors that SCCI connected me to. I feel that they have given me hope and a chance to see my beloved daughter get rid of her disability and grow into a decent adult.

## Mr. Joseph

**17 years, Nürnberg, 2021**

Neurodevelopmental disorders are becoming more and more common due to the rising number of children exposed to electronic devices. Our kid needed an effective and affordable treatment, which is why we visited Vizec Stem Cell Institute. Their services were fantastic with a very professional feel and assuring skills. So I am very thankful that my child underwent stem cell therapy for the disease in India, and now he is recovering very well.

# PATIENT STORIES

“  
**Paul**

**11 years, USA, 2020**

Hi, I am Paul's friend. Paul suffered from intellectual disabilities since he was 6 years old. SCCI has given us scores of new hope. We had listened to lots of positive stories about and I really believe in it. And since last time we have been here in India, I have been noticing and a lot of individuals have told us that this therapy really works. After undergoing this treatment, Paul is able to understand much more. His attention is much better. We really want to thank the team of SCCI.

“  
**Susan**

**6 years, France, 2022**

I am pleased with the treatment I have received for my son with neurodevelopmental disorders. I am impressed by their dedication and how they care for the patient with all their heart. The place's ambiance is child friendly, and the treatment is also very effective. The doctors are very understanding, and this treatment is reasonable for all families. I would highly recommend this treatment for neurodevelopmental disorders to all parents.

“  
**Naushad Rahman**

**10 years, India, 2021**

Hi, my name is Naushad Rahman. This is my son Afnaf Nuashad who is having cerebral palsy and he is having an intellectual disability. He is 14 years now. He was diagnosed with this ailment at the age of 2 and then only we started his medication but his milestones were much delayed. At the age of 6, his condition wasn't much improved as per his age. When we were searching for some clinical treatment for this disorder, we came across stem cell therapy. While probing more about this therapy, we found about Stem Cell Care India. It is one of the best centers for stem cell therapy. We had a chat with its representative and once we did lot of studies, we found this one of much convenient for us and we decided to come down here for our treatment. My son has undergone stem cell treatment here and we hope for the best for the future.

# PATIENT TESTIMONIALS

| PATIENT NAME  | AGE | DISORDER             | COUNTRY     | YEAR OF TREATMENT | FOLLOW-UP FEEDBACK  |
|---------------|-----|----------------------|-------------|-------------------|---|
| Ejaz Khan     | 45  | Sports Injury        | Afghanistan | 2017              | Shakes in the hands gone. Able to get out of the wheelchair.  |
