

HAPPY MUSCULAR DYSTROPHY PATIENTS

OVERVIEW

Dystrophy stands for a group of inherited diseases in which the voluntary muscles progressively weaken. In some forms of this disease, the heart and other organs are also affected.

In Muscular Dystrophy, the weakness affects the muscles. An inherited genetic mistake prevents the body from making a protein that helps build muscles and keep them strong.

KRISHNA YADAV

came from Chandigarh for Duchenne Muscular Dystrophy Treatment

My name is Krishna Yadav, came from Chandigarh to take stem cell treatment for my son. After 5 years, my son suffered from muscle weakness. I took several treatments in Chandigarh for this problem. But I didn't see any improvement in my child's health. At last, I came to stem cell treatment and SCCI. After taking this treatment, my child is able to walk. I am very happy after seeing this.

HAPPY PATIENTS

SUBHAM RANA

Came Delhi for Stem Cell Treatment of LGMD

In Dystrophy, a particular part of the body weakens or wastes away. In muscular dystrophy, the weakness affects the muscles. An inherited genetic mistake prevents the body from making a protein that helps build muscles and keep them strong. Children who are born with muscular dystrophy usually develop normally in the first few years of life. They may suddenly show signs of clumsiness

The purpose of stem cell treatment for muscular dystrophy in India is to stimulate the healing process and aid growth of the affected muscles. Thus, innumerable varieties of improvements are possible after our treatment. Here are some experienced shared by our former patients:

- > Enlarged muscle mass
- > Augmented muscle strength
- > Better-quality balance
- > Reduced stiffness
- > Enhanced range of movement
- > Lessened tremor occurrence
- > Improved development (in kids)

Rash Yadav

1 review

★★★★★ a year ago

Thanks to the stem cell Care India, Julie is now able to stand without any difficulty, swallow better and her hands have amended too, as equated to before getting the treatment. She was enthralled by the care she had gotten during her treatment here in India. She also claimed that the facilities were extremely hygienic and the food was great too.

OUTCOME IN MUSCULAR DYSTROPHY PATIENTS

PATIENT STORIES

Tiara

29 years old, UK, 2017

Tiara was suffering from a serious disease of muscular dystrophy. Her life was truly hard. She then underwent the stem cell therapy at StemCellCareIndia and luckily, is now living a healthy and disease-free life with her family.

Donald

51 years old, Australia, 2019

After three successive stem cell therapy for muscular dystrophy sessions in 2019 at SCCI, Donald could stand using splinters and walker without support. He could climb the stairs and was independent for most of his daily activities.

Beckham

32 years old, Canada, 2016

At the age of 28, Beckham started experiencing weakness in his leg muscles. He would fall or often while running and tire or easily even with minimal activity. He was diagnosed with muscular dystrophy. He came to India for stem cell treatment and he is now very thankful to SCCI as his condition has improved a lot after the treatment.

Federer

18 years old, UK, 2020

Federer was diagnosed with Duchenne muscular dystrophy at the age of 15. His parents took him to India for stem cell treatment of the same at SCCI. Post treatment, his condition has improved a lot.

Tyson

40 years old, US, 2018

After 2 years of stem cell treatment for muscular dystrophy at Stem Cell Care India, Tyson can now stand with the support of push up splint and bilateral support. He was able to dress up faster, do his exercises without any support. He is living a better life now. Thanks to SCCI!

PATIENT STORIES

Justin

42 years, Ireland, 2019

Hello, I am Justin, 42 years from Ireland. I came to India for stem cell therapy for muscular dystrophy. One day, I observed having trouble in breathing and also began experiencing feebleness in my facial muscles affecting my communication. I also began feeling feebleness in my arms and legs. After visiting my local hospital, my physician urged me to go through lab tests and afterward I was detected with muscular dystrophy. My physician told me to go through stem cell treatment. But the hefty expenditures incurred for this treatment made me search for an economical treatment. I explored several websites of a medical group in Singapore, Thailand, India, etc. offering economical stem cell treatment. Inept to take the final decision, one of my friends suggested SCCI in India as his family member had visited India and had a brilliant experience with the excellence of service and attention while undergoing treatment in India. Once I arrived in India, The hospital staff was quite welcoming, caring and kindhearted. I underwent the stem cell treatment that was very successful. It has been a wonderful experience getting my treatment done via SCCI.

Bent

45 years, California, 2020

I am Bent Mark from California and I was a victim of muscular dystrophy from past 5 years. I decided to opt for stem cell treatment via SCCI in India. Once I arrived here, the executive of SCCI sounded pretty welcoming and asked me to send my medical reports. He clarified to me about the whole process and what I should anticipate with this treatment. I also communicated with the doctor who clarified to me that the stem cell treatment targets to regenerate the impaired and missing muscles and help avert further complications. After conversing it with my family, I decided to fly opt for this treatment. After I underwent the treatment, I found that I am recovering fast. I am awestruck with the high-quality facilities and care I got here and would recommend you to anybody wanting an economical treatment in India.

Seema Kumari

39 years, Rajasthan, 2021

Hi, my name is Seema Kumari Saini. I came to Delhi from Jaipur, Rajasthan. I was suffering from muscular dystrophy since past 10-15 years. Initially, I was living a normal life without any impediments. However, as the time and years passed by, I started experiencing weakness and trouble in carrying out normal day-to-day activities. After the diagnosis, I came to know that I am suffering from muscular dystrophy. To treat this problem, I underwent every type of treatment i.e. Allopathy, Ayurvedic, etc. but nothing soothed my pain and suffering. These treatments gave me a relief of 1-2 months but again the disease starts showing its repercussions. Then we researched about stem cell treatment and got to know about Stem Cell Care India. After gathering all the information, we came to Delhi and SCCI's team conducted some major tests of mine. Once the doctors got to know that my reports are normal, they started with my stem cell treatment for muscular dystrophy. The stem cells injections were given to my on the spots where my muscles were very weak. After the injections, I am feeling very positive and relief. My treatment is still going to take 2-3 months more. The doctors here gave me a lot of hope and optimism that I can be in the best of my health very soon. My husband is also a great support to me. I am noticing a lot of improvement in my movement in fingers, thighs, feet, etc. I am satisfied with the treatment. Thanks Team!

PATIENT STORIES

Ava Stone

32 years, Britain, 2022

I am Ava from Britain, and I contacted to stem cell care India team for muscular dystrophy after searching online about stem cell therapy. Management provided me with all the detail within 24 hours related to my treatment. We came to India in 25 days because of the support of Stem Cell Care India. They helped me get a visa to visit India for my condition, and the hospital staff who picked me up from Airport Doctors were well educated. Finally, after the therapy, I do most of my work without support

Spike

63 years, Rajasthan, 2021

Spike was indeed a challenging case as he had fibrosis tumors all over spine and body. Consequently, his spine was very feeble and an ambition of BM was a difficult task to achieve. Before coming for stem cell treatment in India, Spike was hastily losing muscle strength and instead was met with muscle pain. Luckily in 2014, a family friend mentioned about Stem Cell Care India that offers stem cell treatment for muscular dystrophy and other present incurable conditions. In Spike's mother's words, "We thought it was the ray of hope that we all desired. It was a hope for improvement, as until then there was no other substitute." While there was apprehension over the experimental nature of the treatment, the optimism that the condition would alleviate and stop moving ahead were greater. Their first treatment was in 2014 and after the flight to India; they found that after the first some days of familiarizing to the time difference, food, and culture, it was a very comfy and enjoyable stay with the hospital staff being very hospitable, amenable and helpful.

Samaira

22 years, Qatar, 2022

Hi, I am Samira, and I live in Qatar with my family. I have suffered muscular dystrophy for the last 4 years. After some time, I observed that I couldn't walk, stand, and sit correctly. I consulted various doctors and underwent different types of treatment, but nothing worked. But with, stem cell therapy, which is a natural procedure without any adverse effects. I can feel lots of improvements in my condition. I found Stem Cell Care India for the treatment. And I am very much impressed with the hospitality they offer. I want to say Thanks for all your efforts and support that you gave me throughout the procedure.

John

47 years, USA, 2022

My uncle was suffering from a serious ailment of muscular dystrophy. His life was truly hard. He then underwent the stem cell therapy at StemCellCareIndia and fortunately, is now living a healthy and disease-free life.

PATIENT STORIES

Hyatt

38 years, Pakistan, 2022

I am Hyatt Khan Pakistan, contacted to stem cell care India team for muscular dystrophy after searching online about stem cell therapy. Management provide me all the detail in within 24 hours related to my treatment. We came in India in matters of 25 days because of the support of SCCI. They helped to get the visa to visit in India for my condition and SCCI staffed pick up me from Airport and Doctors was well educated and finally after the therapy i am doing most of my work without any support. I can do it my all work independently due to only SCCI efforts. Thanks and best wishes for your all organization.

Maik

56 years, Sweden, 2020

I am Maik Froster from Sweden. I was suffering from Muscular Atrophy problems in my arms from some years. This was making my life miserable and very tough. In an attempt to help me out, my wife started searching for some reliable treatment option for my problem. After some exploration, she found out about the stem cell treatment. Since this treatment was quite expensive in other nations, we got to know that there are many hospitals in India that offer affordable stem cell treatment for muscular atrophy. We chose StemCellCareIndia for getting the treatment. I felt really comfortable here with the staff. After the treatment, my problem has started healing and I am hoping that with time, it will get better. The staff and personnel of StemCellCareIndia are very kind and they communicate each and every detail of the treatment in a good way. After I woke up after the anesthesia during the treatment, they consoled me and told me everything is fine and made me relax and calm down. I totally adore the team of Stem Cell Care India and also the facilities here are very up to the mark.

Michael

67 years, Brazil, 2021

In April 2017, Michael underwent a comprehensive stem cell treatment for his muscular dystrophy, an ailment which has critically obstructed his quality of life since he was 12 he fell down and broke his leg while playing with friends. When he was 12, we went to play with friends and when Michael went to the toilet, he fell down and broke his leg. From then, he began to use the chair. His arms started to become weaker, had less power to pick things up, nurse himself, drink water and he had to start using a computer to write, since he couldn't keep up with the schoolings and he had lots of struggle getting around.

Each year, it became more challenging for him to do his activities. In Brazil, there is no stem cell treatment, and his father, thinking of Michael's welfare and getting better, brought him to India. As a result, He booked his treatment at Stem Cell Care India hospital. And to everybody's surprise, Michael has had improvements with the power of his upper limb muscles, enhancements with his trunk, his balance and his self-confidence has improved enormously. He used to feel immense muscle pain, pain that, after the treatment, his family member don't see any longer. During this year's treatment, they have already noticed some improvements. He used to feel pain in his ribs and now this has alleviated and his father believes that after roughly six months, he will get more improvements with his muscles, more command in his hands and arms, to keep on doing everything that he has been able to do here, like being able to lock his wheelchair and other things that he was not able to do before and everybody hopes that he keeps improving. It is easy to see that Michael is happier and bubblier now.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Ejaz Khan	45	Sports Injury	Afghanistan	2017	Shakes in the hands gone. Able to get out of the wheelchair.
Berley	6	Autism	Canada	2018	Speech and cognitive abilities improved. Balance amended while sitting.
