

HAPPY PANCREATITIS PATIENTS

OVERVIEW

Pancreatitis is a condition that results in the inflammation of the pancreas. The pancreas is a long, flat gland that rests easily behind the stomach in the upper abdomen. .

Pancreatitis happens when the pancreatic duct or its branching blood vessels are blocked by bile or trapped pancreatic juices leading to irritation of surrounding tissue and severe pain.

OUTCOME PANCREATITIS PATIENTS

PATIENT STORIES

Jeannate Lewis

36 years old, California, 2020

I was diagnosed with pancreatitis 6 years ago. I couldn't eat without pain and I'm overweight. I heard about stem cell treatment for pancreatitis. I had the treatment and I'm feeling much better. I can eat anything I want and I've lost 20 pounds. The pain is almost gone.

Farah Korpel

52 years old, Netharland, 2019

: I was looking for a treatment for pancreatitis and found this. Stem Cell Treatment for Pancreatitis at Stem Cell Care India is a novel treatment for pancreatitis. It is painless, cheaper and more effective than other treatments. I highly recommend it.

Parul Thakur

48 years old, Delhi, India, 2018

: I've had chronic pancreatitis for a long time, and I had been suffering from severe abdominal pain even after taking painkillers. Then I found this stem cell treatment. I was definitely sceptical at first, but I decided to give it a try. I was surprised at how quickly the pain started going away after the procedure. I'm feeling much better, and I'm glad to have found this treatment.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Ejaz Khan	45	Sports Injury	Afghanistan	2017	Shakes in the hands gone. Able to get out of the wheelchair.
Berley	6	Autism	Canada	2018	Speech and cognitive abilities improved. Balance amended while sitting.
