

HAPPY SPINAL MUSCULAR ATROPHY PATIENTS

OVERVIEW

Spinal Muscular atrophy (SMA) is a category of developmental diseases in which a person's muscles lose function due to nerve cell damage in the spinal cord and brain stem

Muscle wasting and fatigue are symptoms of spinal muscular atrophy (SMA). Standing, walking, controlling head movements, and, in some situations, breathing and swallowing may be problematic for those with SMA.

OUTCOME IN SPINAL MUSCULAR ATROPHY PATIENTS

PATIENT STORIES

Jamie

24 years, USA, 2022

Jamie was exhibiting visible signs of SMD since the year 2009 and he was lastly diagnosed spinal muscular dystrophy in 2011. Despite physical therapy and medicines he was not very contented with the outcomes he had accomplished so far. He decided to settle on stem cell therapy in India via SCCI. After the treatment, he experienced lots of health improvement. Following these improvements, they decided to go ahead with another round of cell therapy for muscular dystrophy treatment in India in 2013 September..

Suraj

36 years, India, 2022

Hi I am Suraj father of Vivaan Thakur. He was diagnosed with spinal muscular atrophy, and I was shocked and disheartened. So I consulted different doctors about his state, and at least one of my friends found out about Stem Cell Care India in India and suggested me to visit there. The whole staff helped us and got my son treated conveniently and at a very reasonable cost. And currently, he is doing very well in improving.

Nelson

29 years, Kenya, 2022

Mr. Nelson, 29 year old, who had been living with Spinal Muscular Dystrophy for all his life, was determined not to let the ailment take a toll on him. He was only a mere 4 years old when he was inadvertently discovered to have marks of muscular dystrophy, during a routine health inspection when his father stated to the doctor about his trouble in getting up when sitting on the floor and his propensity to often fall while running. The doctor recommended a muscle biopsy and the outcomes sent a wave of misery in the heart of his parents when it confirmed the analysis of spinal muscular dystrophy. His father then decided to take him to India for stem cell therapy and contacted SCCI. It has been 2 sessions of the treatment now and Nelson and his father are quite happy with his improving condition.

PATIENT STORIES

Thomas 42 years, California, 2020

I visited India in 2017 with my husband for treatment as he was suffering from Spinal muscular atrophy, and he was getting weak over time. As a result, he has become reliant on others for his daily activities. So I was looking for the best treatment options available, and I found out about Global Stem Cell Care, which offers safe, painless, and cost-effective stem cell treatment for the disorder. I am delighted that I visited Stem Cell Care India, and they gave all support and care towards my husband's treatment process, and now we can observe some more improvements in his condition.

Raffsana 29 years, Hyderabad, 2022

I visited India for the treatment of spinal muscular therapy for my mother. First, during an examination, he discussed his state with the doctor about problems getting up when sitting on the floor. Then, after some tests, the health care provider confirmed the spinal muscular atrophy. After that, the doctor suggested us to visit Stem Cell Care India in India for stem cell therapy to complete further procedures. And it's been a month of treatment, and we can see the improvements in his condition and we are pretty happy with the whole team.

Sabrina 33 years, Saudi Arabia, 2021

I have been showing visible signs of spinal muscular atrophy since the age of sixteen and was finally diagnosed at eighteen. I consulted various health care providers, and they prescribed me physical therapy and medication, but nothing worked out. I was not getting the desired results. So, I searched online for the best hospitals for my treatment. Then one good day, when I was searching about that, I came to know about the stem cell therapy offered by Stem Cell Care India in India. So, I reached there, and without any delay, I underwent the process. After the treatment, I experienced many health improvements and am very satisfied with the outcomes.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Ejaz Khan	45	Sports Injury	Afghanistan	2017	Shakes in the hands gone. Able to get out of the wheelchair.
Berley	6	Autism	Canada	2018	Speech and cognitive abilities improved. Balance amended while sitting.
Justin	32	Muscular dystrophy	Brazil	2017	Balance and feet strength improved. Was able to get out of wheelchair unaided.
Mohd. Kasim	72	Type 2 Diabetes	Kuwait	2019	100 % bladder control was there and patient's sugar levels were under control.
Wasim Jafar	39	Motor Neuron Disease	Ghana	2020	Muscle strength improved. Able to live a better and healthier life than before.
Kevin	12	Ataxia	USA	2020	Walking was improved to a great extent. Patient was able to balance himself better.
Jim Mark	29	Liver Cirrhosis	Lebanon	2019	The patient's liver function improved and is able to eat food in a better way.
