# OUTCOME VITILIGO PATIENTS

### **PATIENT STORIES**

### Madelyn Jl Drennan

24 years old, US, 2019

I've been looking for a safe and effective treatment to make my vitiligo less noticeable and I found it. Stem cell therapy is a proven treatment to improve the condition of vitiligo and I'm amazed by the results. Some of my white spots are starting to get darker and my skin is becoming much smoother. I would highly recommend this treatment for people with vitiligo.

### Nichole Moeller 29 years old, Germany, 2020

When it comes to skin conditions, we're always looking for a treatment that will deliver visible and efficient results. After the stem cell therapy, I was able to see the results in just the first few weeks. It was a lot less painful than what I had thought it would be and it's a lot safer than other methods that I've tried so far.

#### Abdur Rahim 15 years old, Onam, 2020

At the age of 15, I was diagnosed with Vitiligo. My family was distraught and could not find the appropriate treatment to cure my condition. One day when my mother was browsing about the same

### Animesh Malohotra

20 years old, Jaipur, India 2021

I've been suffering from Vitiligo for a while now, and it's been a real pain. It's gotten to the point where I'm so embarrassed to go out in public or even to my own job because of how horrible it looks. I really didn't think there was any other option. But then I heard about stem cell therapy and I figured it was worth a shot. I was able to get in touch with a leading stem cell expert and I had the procedure done. The results were amazing and I was finally able to feel confident in my own skin again!

### **PATIENT STORIES**

### **Dino Browns**

20 years old, Narway, 2020

Hi, I am Dino resident of Norway. When I heard about stem cell therapy through Stem Cell Institute, I contacted them and discussed all the essential details about my issues with their stem cell expert. Then the doctors asked me to visit them. When I reached the hospital, their staff picked me up from the airport. We went to the hospital for a 1-week program of stem cell therapy. I am delighted with the help of the staff and the results of the treatment offered by the team.

I've been suffering from Vitiligo for a while, and it's been a real pain. It's gotten to the point where I'm embarrassed to go out in public or even to my job because of how horrible it looks. I didn't think there was any other option. But then I heard about stem cell therapy through Stem Cell Institute, and I figured it was worth a shot. I got in touch with a leading stem cell expert and had the procedure done. The results were terrific, and I was finally able to feel confident in my skin again.

### Surbhi sikka

14 years old, San Marinno, 2021

Since the age of 14 years, I have been suffering from a skin disorder called vitiligo. I was very disheartened and disturbed as I could not find the appropriate treatment for my state. Then I learned about Stem Cell Institute, which provides stem cell therapy for multiple diseases, including my condition. After the stem cell therapy, I could see the results in just the first few weeks. It was much less painful than I had thought, and it's safer than other methods I've tried.!

| PATIENT<br>NAME | AGE  | DISORDER                | COUNTRY     | YEAR OF<br>TREATMENT | FOLLOW-UP FEEDBACK  |
