

HAPPY WOUND DISEASE PATIENTS

OVERVIEW

The skin is a sensitive part and a simple cut or damage can turn fatal if not treated at the right time. The causes of injury may be the result of mechanical, chemical, electrical, thermal, or nuclear sources. Depending upon the mechanism of injury, the skin can be damaged in a variety of ways.

Inflammation is the skin's initial response to injury of any kind.

OUTCOME WOUND PATIENTS

PATIENT STORIES

“ **Finlay Hankok**

54 years old, England, 2022

I have tried other conventional treatments but recently stumbled upon stem cell therapy at SCCI in India and I have to say that this is the most effective. The treatment was not painful and I love the results. The overall experience was great, even the doctor was very polite. I highly recommend this clinic.

“ **Kanchan Bhatt**

40 years old, Uttrakhand, 2019

I have been treated with stem cell therapy for wounds and have been amazed at the results. The therapy is less painful and has a much faster recovery time than other treatments. I would recommend this treatment to anyone who needs to treat any sort of wound or burn. This is a good choice and the price is affordable.

“ **Raseed**

38 years old, Pakistan, 2021

I want to express my appreciation towards the doctors at StemCellCareIndia for relieving me of my wound problems and making my life full of happiness again.

“ **Ryan**

34 years old, Saudi Arabia, 2022

It was just by chance that Ryan learned about Stem Cell Care India. He had been suffering a diabetic ulcer on the bottom heel of his left foot for six months and the treatment he had been getting had not been curative for the wound. Physicians suggested amputating Ryan's foot. He jumped at the chance to have a discussion with doctors at Stem Cell Care India. There, the doctors saw that he suffered from osteomyelitis, a septicity of the bone that developed from the foot ulcer. They suggested immediate surgery to confiscate the infected part of his bone, massive antibiotics to treat the infection, followed by stem cell therapy. They introduced stem cell treatment for Ryan, which they implemented at the clinic. These specific stem cells, called the mesenchymal stem cell (MSC), have been found to upsurge wound healing, when applied together with a biomaterial made from collagen, and implanted into the wound. In addition to the stem cell treatment, nurses at the clinic cleaned Ryan's wound and dressed and wrapped it for optimal healing.

PATIENT STORIES

“ **Luckas Schererl**

56 years old, Germany, 2020

I was looking for a stem cell treatment for my wound and the treatment I received from Stem Cell Care India was the best I could get. I had very little pain and my wound healed in weeks. I am very happy with the service and also thankful to their team for assisting me in my stay. I am sure I could have never found such a great stem cell clinic if my brother didn't help me, also I will recommend them to anyone who needs a stem cell treatment.

“ **Nelson**

46 years old, US, 2019

Hi, I am Nelson, and I visited India to treat my wounds via stem cells. I was searching for a stem cell treatment for my injury, and the treatment I received from stem cell was the best I could get

“ **Tonmoy Baruah**

40 years old, Assam, 2021

I have been treated with stem cell therapy via Stem Cell Institute, and I have to say that this is the most effective. The treatment was not painful, and I love the results.

“ **Linda**

45 years old, America, 2020

Linda is a 45 year-old American who suffered from wounds on her body and had been searching in vain for prospective medical treatment options. She have had wounds problem for around 2.5 years now. She found out about Stem Cell Care India and went for the stem cell treatment in October 2017 here. She feels great now after the treatment. The stem cell process was a walk in the park equated to other wound healing treatment that went futile on her. She was in and out in only a matter of few hours. She felt a little bit uncomfortable subsequently but nothing excruciating. Her wound healing capacity on the second day was 1000% better than the first day.

PATIENT TESTIMONIALS

PATIENT NAME	AGE	DISORDER	COUNTRY	YEAR OF TREATMENT	FOLLOW-UP FEEDBACK
Ejaz Khan	45	Sports Injury	Afghanistan	2017	Shakes in the hands gone. Able to get out of the wheelchair.
Berley	6	Autism	Canada	2018	Speech and cognitive abilities improved. Balance amended while sitting.
