Retinopathy

Jimmy

39 years old, UK, 2016

Jimmy had a retinopathy issue for the past 3 years. After undergoing stem cell treatment with SCCI in India, the vision of Jimmy improved after the transplantation of the cells. Overall, his improved by about three lines on the standard visual acuity chart.

Kenza

59 years old, Canada, 2017

Kenza was blind in the eye she had been treated for. A month after the stem cell therapy with SCCI, her vision had improved by 10 lines and she could do her fashion designing work again. She could use her computer or read a book comfortably.

Mr. Paul

75 years old, US, 2018

Mr. Paul and his wife both are really pleased with the SCCI's professionalism. They came to India for stem cell treatment of retinopathy and after the treatment with SCCI; they were very satisfied with the results.

Smith

60 years old, Australia, 2019

Retinopathy caused Smith's vision to deteriorate over quite some years to the point where he had to resign from his dream job of a fashion designer. He came to India for stem cell treatment with SCCI and was very pleased with the treatment results.

Marie

58 years old, UK, 2020

After undergoing stem cell procedure with the assistance of SCCI's team, in which stem cells were extracted from bone marrow in her hip were injected into a different region in each eye, she progressively recuperated some of her sight which was lost because of retinopathy.

Retinal Detachment

Zara Gracia

26 years old, France, 2020

I was diagnosed with retinal detachment and my doctor told me that I needed an operation to repair the detached retina. I didn't want to have surgery, so I started looking for alternative treatments. When I found Stem Cell Treatment I was very excited. It sounded less painful and was less expensive than surgery. I went for it. I got it and I'm happy to report that after just a few months my vision is way better and I can see things clearly. Thank you Stem Cell Care India!

Colette Cousteau

52 years old, Switzerland, 2021

My eye doctor recommended a stem cell treatment. I wasn't able to get the treatment done in my country, so I got on a plane and went to a clinic in India. The stem cell treatment is available to anyone. The cost was much less than it would have cost me in my own country, and the results were amazing. I had my treatment done 10 months ago and I haven't had any problems with my eyes since then. I can see well than I did before my retinal detachment.

Liv A. Sørensen (Copenhagen, Denmark): I had a retinal detachment and I was really afraid to go through surgery and the recovery time. I found that the stem cell treatments were very effective and less time-consuming due to this fear and I am very happy with the results. I will definitely suggest it to anyone who has the same problem.

Ramsha Akhtar

30 years old, kuwait, 2022

I had retinal detachment, and then my cousin suggested this stem cell treatment, and to be honest, it helped me a lot. So, if you are looking for something affordable and effective, I highly recommend this treatment, and the best part is that it has no side effects to worry about. We reached the hospital in a few days because of the support they are offering, and also, they helped me with all the VISA work. Their staff picked me up from the airport, and the doctors were well-educated and supportive throughout the treatment procedure.

Rahul

52 years, Haryana, 2020

My husband was diagnosed with Retinitis Pigmentosa 15 years ago. At the age of 29, his condition started to worsen and we couldn't find any lucrative treatment anywhere. The blurring vision at night was an escalating issue, so we consulted SCCI for stem cell therapy. He is recovering and his condition is improving. We are hoping for positive results ahead.

Rosy

30 years, Texas, 2021

Rosie has been bit by bit losing her vision since infancy because of retinitis pigmentosa (RP), an inherited, irredeemable disease. In 2018, she volunteered for opting for stem cell therapy that involves use of stem cells to restore her vision. She contacted SCCI for the same. After her treatment, she experienced a lot of improvement in her vision. She wants to thank the entire team of SCCI and she really appreciates the professionalism that the staff here exhibited.

Retinitis Pigmentosa

Shreya

32 years, California, 2022

Hi, I am 32 years old Shreya from California. I visited India for stem cell treatment. I have retinitis pigmentosa, a degenerative eye disease that destroys the light-sensitive cells in the retina. It is progressive, degenerative, and incurable. I was told that I would eventually go blind. Well, I started stem cell treatment, and what was once a blurry world is now sharp and clear. I am grateful to the stem cell treatment and the fantastic SCCI Stem Cell Institute team who have made this possible.

Glaucoma

Kevin Halter

40 years old, US, 2020

I was diagnosed with glaucoma when I was 14 years old. I have tried several treatment methods, but nothing worked. Then my doctor referred me to Stem Cell Care in India

Komal Singh

18 years old, California, 2022

I visited India with my mother to treat her glaucoma. My mom has been battling glaucoma for the past few years, and I was so worried when her eyesight started to get worse

Farina Ahmad

22 years old, Pakistan, 2022

Hi, I am Farina. I was diagnosed with Glaucoma, and at that time, I was looking for an effective treatment to cure my condition. Then I learned about stem cell therapy for hair loss through SCCI

Bennet Paul

38 years old, UK, 2021

I have been a patient with glaucoma. So, I contacted SCCI, which offers stem cell treatment for the same. I talked to one of the doctors, and he clarified everything in detail about the process and treatment procedure

Optic Nerve Atrophy

James

69 years, Australia, 2016

James had been suffering from optic nerve atrophy from 2014. He decided to contact SCCI for undergoing stem cell therapy. He appreciates the adept and revolutionary methods of stem cell therapy that StemCellCareIndia offered for the cure of Optic Nerve Atrophy (ONA).

Nora

61 years, Canada, 2018

Nora wants to thank the team of Stem Cell Care India for providing first-rate treatment facilities. Post-treatment, she was able to experience improved vision capabilities and her condition improved tremendously after that.

Michael

59 years, UK, 2019

team of SCCI is quite advantageous and they helped Michael see the world again with a new affirmative outlook. He is very appreciative of the team and the doctors here too.

Pamela

57 years old, Ireland, 2017

Pamela from Ireland has suffered from visual damage all her life and was diagnosed with optic nerve atrophy. She then decided to visit India for undergoing stem cell treatment. She is happy with the team of SCCI for helping her well in her treatment process.

Vienna

81 years, US, 2020

Vienna came to India to find cure for optic nerve atrophy with stem cells. She contacted the team of SCCI. She been blind for more than five years, but after undergoing stem cell therapy where stem cells extracted from her bone marrow were injected into her right eye's retina and left eye's optic nerve, she has recuperated some of her sight.

Eye Injury

Victoria

42 years, England, 2022

After encountering a car accident in eighth grade, Victoria developed optic nerve atrophy (ONA), which instigated her vision to worsen over quite a lot of years to the point where she had to leave her much-loved job. She first started losing her vision superficially. This was a very slow and steady procedure. She was still able to partake routinely in sports and curriculums in high school. After high school, when she graduated, she had my first central vision loss. Then she decided to opt for stem cell treatment at SCCI. She feels much better in her vision after she went in for the treatment.

Chris

36 years, Germany, 2022

Hi, I am Chris from Germany, and I came to India a few months back for stem cell therapy. I was diagnosed with a severe eye injury, which affected my visual arena. And over time, I started experiencing vision loss due to the restricted range of vision. After much research and searching online, I learned about SCCI, offering stem cell therapy which proves to be a safe and effective treatment for my condition. Then I decided to fly to India for the further procedure. Now, after the treatment, I can observe many improvements in my vision

Optic Nerve Hypoplasia

Belli

22 years, UK, 2022

Belli lost her sight in a matter of weeks in 2014 because of a severe case of optic neuritis – inflammation of an optic nerve that causes gradually blurry vision as the nerve could no longer interconnect with the brain. Until recently, dark shadows were the solitary thing she could make out, and she used a stick and numerous technological devices to help her move around. After undergoing stem cell therapy at SCCI, in which stem cells extracted from bone marrow in her hip were injected into a diverse area in each eye, she progressively recuperated some of her sight. She can now read menus and street signs, get around without her stick, and have seen her husband's face for the first time in 4 years.

John's Daughter

9 years, Boston, 2022

Hello, I am John Boswell from Boston, Texas; my kid showcased signs of Optic Nerve Hypoplasia, and we were scared for his vision loss. We wanted to seek a way out and start therapy for his eyes soon. Motivated to seek a complete cure, we were ready to try out any possible way out of the problem. While seeking such therapies, we learned about Stem Cell Care India and communicated with them regarding the treatment. They told us that their Stem Cell Therapy could help our kid and bring betterment to his vision. Motivated to try this therapy, we booked our appointments and came to India. Our treatment was done with the utmost care, and our kid was given the best care possible. After the treatment, we saw improvements in the symptoms. The therapy can help in rehabilitation and minimize the inflammation of cells in the eye, according to Stem Cell Care India, and I guess that's how they helped my son

Katie

4 years, USA, 2021

Katie is a 4-year-old kid and she traveled to India with her parents to get stem cell treatment for optic nerve hypoplasia. Katie was first treated with stem cells in April of 2018 via SCCI. After her first treatment, she started to see light and distinguish colors. With both eyes, she was also able to read and identify the colors of a green sign some 30 feet away. These improvements are not the first for Katie, and the family is undoubtedly hoping they are not the last.

Charlie

17 years, Hungary, 2022

After getting into a car accident when Charlie was 17 years of age, he developed optic neuropathy issue, which caused her vision to worsen over quite a few years to the point where he had to resign from his dream job of a photographer. This is when Charlie started his research into stem cell treatment. After an in-depth research, he underwent stem cell therapy in India via SCCI. After the treatment, he is able to experience a lot of improvement in his condition and he hopes to join back his job soon.

Katie

4 years, USA, 2021

Kevin has suffered from visual impairment all his life, but her optic neuropathy diagnosis and worsening condition together with a lack of treatment choices was heartbreaking. This all improved when Kevin and his wife planned to opt for stem cell treatment in India. They contacted Stem Cell Care India and flew to India. After the treatment, he was able to experience a lot of improvement in her vision and overall health condition. He is very thankful to the entire staff of SCCI for supporting his stay in India so well.

Optic Neuropathy

Kunal's Father

8 years, Kolkata, 2022

I am Kunal's father, Mr. Vishwajeet Mondal. I came to Delhi from Kolkata. My son has been suffering from Optic Neuropathy for the past 2 years. His treatment course is going on during which he developed some eye problems. His vision in both eyes has reduced significantly. We were really bothered for him and took him to several clinics for treatment. But there was not much improvement in his condition. Then, we came to Delhi and got to know about stem cell treatment for optic atrophy from Stem Cell Care India. The doctors at Stem Cell Care India promised to treat my son's eyes perfectly. So, as per their promise, they have been treating my son with great care and precision via stem cell therapy. Stem cell injections have been given to my son, and doctors also gave him multi-vitamin tablets. We will be leaving for Kolkata on 5th October 2020, and we are hopeful that this treatment works really well on him and we are quite appreciative of the staff of Stem Cell Care India.

Age-Related Macular Degeneration

Johnson

41 years, South Africa, 2021

The treatment was painless, and it was a quick process. After not too much of a wait, the results were apparent. I had heard about the treatment from a friend whose acquaintance recently got it for another condition. I had my doubts at first, but SCCI Stem Cell Institute doctors helped me a lot. Thanks again to the whole team of SCCI.

Sanjay

42 years, India, 2022

I am very happy with the treatment. The results are encouraging. I can see a big difference in my vision. The pain was not as bad as I expected. I would definitely recommend it to others.

Rachel

29 years, USA, 2022

The treatment was painless and it was a quick process. After not too much of a wait, the results were apparent. I had heard about the treatment from a friend whose acquaintance recently got it for some other condition. I had my doubts at 1st but Stem Cell Care doctors really helped me a lot. Thanks again team SCCI.

Charles

47 years, Texas, 2022

I am very happy with the treatment. The results are encouraging. I can see a big difference in my vision. The pain was not as bad as I expected. I would definitely recommend it to others.
